DETAILED ACTION

Allowable Subject Matter

1. Claims 18-23,25-36 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art cited does not anticipate individually nor teach in combination:
 - A method for forming a lamp assembly, comprising: providing a mold having a predetermined shape corresponding to the desired shape of said lamp assembly; positioning a circuit board having a plurality of light emitting diodes mounted thereto in said mold; filling the mold with a flowable lens material to immerse the LEDs within the material and such that the flowable lens material itself forms the exterior of the lamp assembly; hardening the lens material such that the flowable material forming the exterior of the lamp assembly provides a rigid exterior of the lamp assembly; and removing the lamp assembly from the mold; reusing said mold for molding subsequent lamp assemblies.
 - A method for forming a lamp assembly comprising: providing a mold having a shape corresponding to the desired shape of said lamp assembly; positioning a circuit board having a plurality of light emitting diodes ("LEDs") mounted thereto in said mold; filling the mold with a flowable lens material to immerse the LEDs and the circuit board within the material and such that the flowable lens material itself forms the exterior of the lamp assembly; hardening the lens material such that the flowable material forming the exterior of the

lamp assembly provides a rigid exterior of the lamp assembly; and reusing said mold for molding subsequent lamp assemblies.

- A method for forming a lamp assembly comprising providing a mold corresponding to the desired shape of said lamp assembly; positioning a plurality of light emitting diodes in said mold; interconnecting the LEDs to an electrical lead; filling the mold with a flowable lens material to immerse the LEDs within the material and such that the flowable lens material itself forms the exterior of the lamp assembly; hardening the lens material such that the flowable material forming the exterior of the lamp assembly provides a rigid exterior of the lamp assembly; and reusing said mold for molding subsequent lamp assemblies.
- Vilanilam in particular does not disclose the step of the glass jewel/mold being reused for molding subsequent lamp assemblies, in particular since the glass jewel/mold of Vilanilam is a fixed part of the lamp forming the exterior surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
